## Presentation

*Birth of a new stage in the Catholic University of Murcia with two courses and Master Training Specialist in Oral Implantology Periodontology associated with, and bone regeneration. Education in new techniques of treatment in patients with bone and soft tissue deficiencies require a quality academic training.*

This two Specialist and Master courses are unique in that once the Teaching patients and clinical activity, students of both courses will conduct a scientific and educational stay at the Faculty of Dentistry at the University of Stony Brook, Long Island, in New York. Another feature of the Master is eminently clinical, master classes and especially a part of the master Online, in English and Spanish, with clinical cases and updated bibliography.

Have the possibility of students in the Specialist Course a year, should continue the following year for the degree of Master of Oral Implantology.

Students of both courses also have the possibility of collaborating with the Research Chair in Dentistry Research projects funded and the possibility of also collaborate on writing scientific articles and clinical stays in Foreign Universities (Chieti, Pisa, Belgrade, Stony Brook, New York).

## Student Profile

*Master studies completed officer training in dentistry studies allowing the acquisition of an approach to the patient from a complementary perspective to studies of Dentistry, this training has application in the fields of activity of dentistry. The implant is an alternative treatment for cases of partial and total edentulous which is currently required for troubleshooting edentulous highly predictable and appropriate aesthetics. Supplementation with the specialties of periodontics and tissue regeneration allows highly qualified clinicians according to the needs of the dental field today.*
