Tutorials

General objective of the academic tutorials: “Guide and advise students in the process of teaching-learning and contribute to the consolidation of knowledge, skills, abilities, attitudes connected to the cross curricular or general subjects, such as team work, oral or written communication, values”. There will be two tutorials in the classroom, one in each mid-term exam in order to solve doubts about tasks or subject contents.

Tutorials in this subject are complemented with university workshops open to students from different degrees, since from the personal intra-university relationship it is easier to reach the main objective of the subject: comprehensive education.

The student can also solve his doubts and problems during the timetable of attention to the students.

The university also has a Special Team for tutorials with the students enrolled in the degree. All students registered in UCAM have a personal tutor from the Special Tutors Team, when they register for the first time in the university, hence the student has this accompaniment during the complete university period.
