Student Profile

The Bachelor's degree in International Relations is designed for students who come from different areas of knowledge within the social sciences and must be receptive to personal and comprehensive training.

Therefore, they should have a special interest in the field of International Relations and also in broadening their cultural, economic and social knowledge; serving the community in a highly ethical manner in their professional performance; learning about international environments and their problems – covering all aspects: companies, institutions, countries, intermediaries, etc; being social and able to relate to people; good communication and commercial skills; and being sensitive towards cultural and natural resources and their sustainable management.

Career Opportunities

The flexible profiles of International Relations professionals allow them to adapt to a growing range of jobs and professions. Precisely these three characteristics – flexibility, adaptability, and mobility – of the programmes' graduates tend to be the determining factors when employers recruit them.

This degree will enable graduates to pursue the following professional careers opportunities:

- Executive in a multinational company
- Development expert in an NGO
- Political consultant
- Government Relations Manager
- International representative
- Consultant in multinational entities
- Foreign Trade
- Member of international institutions
- International relations expert in educational institutions
- International Affairs Advisor
- International Project Manager
- Humanitarian missions and voluntary service
- Expert in international negotiations

Objectives

- Write and express oneself fluently, efficiently, competently, and correctly, in a clear and unambiguous manner, making use of the concepts, terms and specific terminology of the scientific area of International Relations.
- Interact, cooperate or work in educational or organisational contexts influenced or defined by internationalisation.
- Plan tasks and projects of an international nature in an effective and inclusive way.
- Make skilful, appropriate, and convenient use of global information and communication technologies (ICTs) and to assess their impact on the evolution of International Relations.
- Analyse, synthesise and integrate knowledge, as well as to face the complexity of formulating judgements based on readings, recordings or dialogues of diverse origin, all in a reflective, argued, creative and multidisciplinary way within the field of International Relations.
- Apply the knowledge acquired to problem solving in new or unfamiliar environments with a multidisciplinary approach specific to International Relations.
- Critically assess the international reality and its specific problems.
- Acquire the learning skills that will enable graduates to continue studying in an autonomous and self-directed way in the field of International Relations.
